

NovaCRM 4.0 — Product Manual

Customer Relationship Management Platform | Enterprise Edition | Released: March 2024

NovaCRM 4.0 is an AI-powered, cloud-native CRM platform designed for Indian mid-market and enterprise businesses. It integrates sales automation, customer support, marketing campaigns, and business intelligence into a single unified platform. This manual covers all modules, configuration options, and integration capabilities.

Chapter 1: Platform Overview

NovaCRM 4.0 is built on a microservices architecture hosted on AWS Mumbai region with 99.9% SLA uptime. The platform supports up to 10,000 concurrent users per enterprise tenant and is ISO 27001 certified. All data is stored in India (MEITY-compliant data residency). The platform offers web, Android, and iOS interfaces.

1.1 Key Differentiators

- AI-powered lead scoring using NovaCRM's Nova Intelligence Engine (NIE)
- Native integration with Indian payment gateways: Razorpay, PayU, and CCAvenue
- GST-compliant invoicing and automated TDS calculation
- WhatsApp Business API integration for customer communication
- Regional language support: Hindi, Marathi, Tamil, Telugu, Kannada, Bengali

1.2 System Requirements

NovaCRM is cloud-hosted SaaS — no on-premise installation required for standard edition. For on-premise (Enterprise Plus): 16-core CPU, 64GB RAM, 2TB SSD RAID, Ubuntu 22.04 LTS. Supported browsers: Chrome 110+, Firefox 110+, Edge 110+.

Chapter 2: Sales Module

The Sales Module manages the complete B2B and B2C sales lifecycle from lead capture to deal closure. It supports both direct sales teams and channel partner networks.

2.1 Lead Management

Leads are captured from: web forms, inbound email, WhatsApp, trade show imports (CSV/Excel), and API integrations with Google Ads, Meta Ads, LinkedIn. Each lead is automatically scored by NIE based on 47 behavioural and firmographic signals. Score range 0-100; scores above 70 trigger automatic assignment to senior sales representatives.

2.2 Opportunity Pipeline

The pipeline supports up to 10 customisable deal stages. Default stages: Qualification, Discovery, Proposal, Negotiation, Closed Won, Closed Lost. Each stage has mandatory fields, checklists, and automated follow-up tasks. Win probability is auto-calculated by NIE based on deal velocity and historical patterns.

2.3 Quotation and Proposal Engine

Supports GST-inclusive and GST-exclusive pricing, multi-currency quotes (INR, USD, AED, SGD), product bundling, and volume-based discount slabs. Proposals generated as branded PDFs from configurable templates. E-signature via Aadhaar eSign and DocuSign.

Chapter 3: Customer Support Module

The Customer Support Module provides a unified helpdesk for managing queries, complaints, and service requests across all channels. Designed for both B2B account management and B2C support centres.

3.1 Ticket Management System

Tickets created automatically from: email, WhatsApp, web chat, phone (CTI), social media (Twitter/X, Facebook). Classified by priority (P1 Critical, P2 High, P3 Medium, P4 Low) and type (Bug, Feature Request, Billing, General Query). SLA breach alerts sent to supervisors when breach risk exceeds 80%.

3.2 SLA Configuration

Priority	First Response	Resolution Time	Escalation
P1 Critical	15 minutes	4 hours	CEO/CTO
P2 High	1 hour	8 hours	Support Manager
P3 Medium	4 hours	24 hours	Team Lead
P4 Low	24 hours	72 hours	Auto-resolve

3.3 Knowledge Base

Built-in Knowledge Base supports articles, FAQs, video embeds, downloadable attachments. Searchable via full-text and AI-semantic search. Articles can be public (customer-facing), internal (agent-only), or partner-restricted. Auto-suggest recommends KB articles to agents, reducing average handling time by up to 35%.

Chapter 4: Marketing Automation Module

Enables B2B and B2C marketing teams to design, execute, and measure multi-channel campaigns from within NovaCRM, without requiring separate marketing software.

4.1 Email Campaign Builder

Drag-and-drop builder with 150+ responsive templates. Supports personalisation tokens, dynamic content blocks, A/B testing. Sender reputation management via dedicated IPs. Deliverability analytics: open rate, click rate, bounce rate, unsubscribe rate.

4.2 WhatsApp Campaign Manager

Integrated with WhatsApp Business API (Meta-approved BSP). Supports broadcast messages, template messages, and conversational flows. Typical delivery rate 95%+. Opt-out management is automatic and TRAI-compliant. Supports Hindi and 5 regional languages.

4.3 Lead Nurturing Workflows

Visual workflow builder with triggers, conditions, and actions. Example: Lead fills demo form then send welcome email then wait 2 days then if email opened assign to sales rep, else send WhatsApp

follow-up. Maximum 50 steps per workflow. Up to 500 active workflows per tenant.

Chapter 5: Reporting and Analytics Module

Provides real-time and historical insights across all NovaCRM modules. Built on NovaCRM's proprietary in-memory analytics engine processing up to 50 million records without degradation.

5.1 Pre-built Dashboards

25 pre-built executive and operational dashboards including: Sales Pipeline Health, Revenue Forecast, Support CSAT Trend, Marketing Campaign ROI, Agent Productivity, Territory Performance, and Customer Lifetime Value. All dashboards update in real-time and are role-based.

5.2 Custom Report Builder

Drag-and-drop custom report builder supports cross-module reporting. Reports can be scheduled for automatic email delivery (daily, weekly, monthly). Export formats: PDF, Excel, CSV, Google Sheets sync. Advanced users can write NovaCRM Query Language (NQL) queries.

5.3 AI Forecasting (Nova Intelligence Engine)

NIE uses ensemble ML models (XGBoost + LSTM) for revenue forecasts with confidence intervals. Forecast accuracy typically 85-92% for 90-day rolling forecasts. Forecasts update every 6 hours. Model retraining happens monthly.

Chapter 6: Integrations and API

NovaCRM 4.0 offers 120+ pre-built integrations and a REST API following OpenAPI 3.0 spec with OAuth 2.0 authentication.

6.1 Popular Integrations

Accounting and Finance: Tally Prime, Zoho Books, QuickBooks, SAP B1

Communication: Gmail, Outlook, WhatsApp Business, Slack, Microsoft Teams

E-commerce: Shopify, WooCommerce, Magento, Amazon Seller Central

Payments: Razorpay, PayU, CCAvenue, Paytm for Business

Marketing: Google Ads, Meta Ads, Mailchimp, Sendinblue
